

TRIT's Commitment to Sustainability – Jewelry with Meaning, Designed to Last

Stockholm, Sweden – March 1, 2025

TRIT believes that fine jewelry should not only celebrate life's most cherished moments but also be crafted with ethical integrity and environmental responsibility. As a brand dedicated to creating timeless, heirloom-quality pieces, we are committed to sustainable practices that minimize waste, protect the planet, and ensure fair working conditions for artisans.

Redefining Sustainability in Fine Jewelry

At TRIT, sustainability is not just a trend—it's a core philosophy woven into every stage of our design and production process. We go beyond surface-level sustainability by prioritizing recycled materials, ethical craftsmanship, and responsible sourcing.

Recycled Precious Metals & Lab-Grown Diamonds

- **Recycled Gold & Silver:** TRIT uses recycled silver and gold to reduce reliance on newly mined metals, minimizing environmental impact.
- **Lab-Grown Diamonds:** We offer lab-grown diamonds as a sustainable choice as well as earth-mined.

Certified Sustainable Manufacturing & Ethical Standards

TRIT partners with **Responsible Jewellery Council (RJC)**-certified factories, ensuring adherence to the highest standards of ethical sourcing, fair labor practices, and environmental responsibility. Our production partners maintain **ISO 9001** certification for quality management and **SMETA (Sedex Members Ethical Trade Audit)** certification for social and environmental responsibility—ensuring compliance with global ethical standards upheld by luxury brands.

Key Certifications & What They Mean:

- **Responsible Jewellery Council (RJC):** The leading global authority on ethical jewelry practices. RJC certification ensures:
 - Responsible sourcing and traceable supply chains
 - Fair labor standards and human rights protections
 - Environmental sustainability in manufacturing
 - Compliance verified by third-party audits from Bureau Veritas and SGS
- **SMETA (Sedex Members Ethical Trade Audit):** The gold standard for ethical supply chains, ensuring:
 - Fair wages and safe working conditions
 - Strict environmental regulations in production
 - Ethical business integrity and social responsibility
- **ISO 9001 Quality Management Certification:** A globally recognized quality assurance standard, guaranteeing:
 - Precision craftsmanship and consistent product quality
 - Strict quality control at every stage of production
 - Reliable and sustainable manufacturing processes

By prioritizing these certifications, TRIT ensures that every piece of jewelry is not only meaningful but also responsibly made—meeting the highest standards of craftsmanship, sustainability, and ethical integrity.

Designed to Be Cherished for Generations

Unlike fast fashion jewelry, TRIT pieces are created to last a lifetime. Every piece is made-to-order, eliminating overproduction and excess inventory waste. This approach allows customers to customize their jewelry without compromising sustainability.

“We believe that jewelry should be more than just an accessory—it should be a reflection of your most meaningful memories. Our commitment to sustainability ensures that TRIT pieces don’t just tell your story but also contribute to a better, more responsible future for the jewelry industry.” – Jenny Syquia, Founder of TRIT
